SYSTEM DESCRIPTION

T 2000 includes a multiple generator, with six outputs: High AC current; Low AC current; Low DC current; Current impulses; High AC voltage; Low AC voltage.

The selected output is adjustable and metered on the large, graphic LCD display. With the multi-purpose control knob and the graphic LCD display it is possible to enter the MENU mode, that allows to control all functions, and makes T 2000 the most powerful testing device, with manual and automatic testing capabilities, and with the possibility to transfer test results to a PC via the RS232 interface. These results can be recorded, displayed and analysed by the powerful TDMS software, which operates with all WINDOWS versions, starting from WINDOWS 98 included.

Note: WINDOWS is a trademark of MICROSOFT inc.

Additional features are:

- . Oscilloscope function: it is possible to display the current and voltage waveform measured;
- . Two independent measurement inputs, for current and voltage, and with High and Low inputs each, allow measuring CT or VT outputs or any other source;
- . The optional thermal printer gives the immediate printout of the CT saturation curve and other test results;

The instrument is housed in a transportable aluminium box, which is provided with removable cover and handles for ease of transportation.

High Current Booster

The current output of T 2000 can be increased up to 2000 A with a new type of optional booster controlled by the T 2000 control unit. The BU 2000 option is an innovative design concept that allows to avoid the power losses due to long cables connections. To achieve this, the BU 2000 transformer is placed very close to the device under test (CT primary side, Circuit Breaker main contacts), thus avoiding losses on the high current cables. The BU 2000 is then connected with a long (20 m) low current cable to T 2000 unit. The option can use one, two or four transformers, as a function of the maximum test current and/or the test duration (see table below).

In case of 2 to 4 BU 2000 units, an Interposing Module is necessary.
